

ABSTRACT

There is provided a vibration-proof glove which is wore particularly in an operation with a vibration tool such as a rock drill or engine cutter. The vibration-proof glove comprises a stretchy glove body 1 made of such as a knit material, and a vulcanized foam rubber 2 provided at least on the palm portion of the globe body. A plurality of crosswise grooves 2a or lengthwise grooves 2b are provided on the palm portion of the glove. The vulcanized foam rubber material 2 may be formed with chloropylene rubber or natural rubber.
